Proposal Review Form

I) Proposal Summary

Title	Support the electricity utility performance improvement in Gabon and Cameroon
TTL Name	Yang Liu
Region	Africa
Country	Gabon,Cameroon
Primary Reviewer	Anders Pedersen
Deadline for Primary Reviewer	04/17/2026
Secondary Reviewer(s)	Perla Castillo,Aarushi Sinha,Samantha M. Constant,Barbara Ungari,Anthony Granville,Maëlle Lea Marie Baronnet,Kabir Malik
Deadline for Secondary Reviewer(s)	04/10/2026
Project ID (P#)	P505786

II) Reviewer's Recommendation

ESMAP Reviewer's key recommendation on the proposal :

Accept conditionally – please incorporate the following comments at the concept stage

Comments

The proposal is recommended for conditional approval subject to the following updates:

- The team should demonstrate how the capacity building activity 11.2 will leverage and connect with the current global Impact Academy on Utility Performance.
- For completed analytical outputs eg. financial models and analytics under 11.1 the team is requested to contribute at relevant ESMAP dissemination and knowledge sharing opportunities eg. webinars.
- For the second outcome the team should describe how the training and capacity building will be used by the client, for example for improved procedures and efficiency measures at the utility.

III) Project Description & Budget

1) Is the project description clear?

Yes

Comments

The project description is clear. It is positive to see close collaboration with IFC on activity 11.1 regarding utility performance.

2) ESMAP Thematic & Workstream

Source of Fund	Amount(Phase 1)
ESMAP Thematic Funding: BETF(ASA)	\$50,000
Bank Budget	\$10,000
Other Sources	\$0
Grand Total Cost	\$60,000

3) ESMAP Thematic Funding Details

3.1) ESMAP Thematic Funding: BETF(ASA)

Thematic Funding	Amount(Phase 1)
Foundations	
Infrastructure: Modernized energy systems	\$50,000

IV) Other Cross-Cutting Issues

1) Does the proposed activity include gender in any of the following three dimensions?

2) Comments based on PSF (e.g. How gender integration into the three dimensions above could be strengthened? Are there any links to existing gender and energy work within ESMAP/WBG?)

N/A

V) Funding Plan

1) At least 10% regional contribution (BB)?

Yes

2) Realistic/acceptable as is?

Yes

VI) Expected Outcome(s)

1) Outcomes & indicator in PSF

Outcome Indicators

Countries with enacted policies, regulations and plans on energy subsidy reform, utility modernization, regional markets, and data & AI driven energy planning (Number)

Intermediate Outcome Indicators

Increased client technical capacity to implement WB and other MDB projects (number of clients)

2) Are the outcomes well formulated , and/or likely to be achieved; or is further revision required?

See above.

VII) Delivery Schedule

1) Is the delivery schedule realistic/acceptable?

Yes

VIII) Any Other Comments
